TECHNICAL REQUIREMENTS FOR ADVERTISING

PDF ACCORDING TO PDF/X-1A OR PDF VERSION 1.3. STANDARD (COMPATIBILITY WITH ADOBE ACROBAT 4.0)

The document must be created by converting the postscript file by Adobe Distiller, printing to PDF, exporting (e.g. from Adobe InDesign, Illustrator), but only under conditions set in PDF/X-1a standard or version 1.3 standard. It must also (if the advertisement is for the trim size) contain at least 5 mm bleed, crop marks of at least 4 mm from the trim size. PDF file must not contain objects in RGB colour space and spot colours, embedded ICC profiles, OPI information.

OTHER FORMATS BY AGREEMENT

For checking the colour scheme it is appropriate to supply a colour design, which has been created according to the ISO 12647-2:2013 (FOGRA51) standard. In the event that ISO 12647-2:2013 is not adhered to, we shall be not liable for the required colour scheme and for errors that arise during the processing of the advertisement. For the colour transfer of used bitmap files from various colour spaces to a CMYK colour space, we recommend using profiles of the following standard: ISO 12647-2:2013 (PSO Coated v3 FOGRA51). This standard is used in creating the content of the periodical, for creating a certified proof copy and for printing. We shall not be liable for the required colour scheme in the event that other ICC profiles or other methods for transferring into CMYK are used. Adobe Creative Suite 5 and 6 are used for processing.

It is possible to supply data on the following media: CD, DVD, on portable USB and FireWire (IEEE 1394) disks, via electronic mail, via an FTP server (access on request), via www.uschovna.cz. Other transfer possibilities can be arranged by agreement.
